

Lecture Series – Pitfalls and Solutions

Good Experimental Design

Professional Biobanking on-site – challenges and solutions

Speakers: **PD Dr. Alexandra Nieters** (FREEZE Biobank, CCI Biobank)

Dr. Peter Bronsert (CCCF – Tissue Biobank)

Date & Time: **24.07.2019** from **17:00-18:00**

Venue: Seminar room window, ZTZ, Breisacher Str. 115

Abstract:

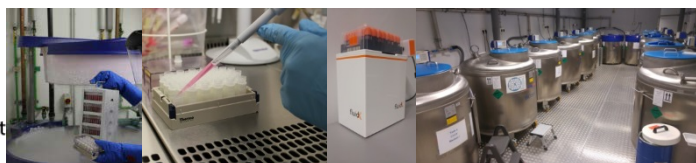

Adequately processed, stored and annotated biological samples are the prerequisite for successful biomedical research and their importance in times of emerging technologies is rather increasing. In the context of the EU General Data Protection Regulation (GDPR), new legal requirements need to be followed and an increasing number of high-ranked journals require confirmation of adequate biobanking before manuscripts will be accepted. Professionalized and harmonized biobanking in the context of the University Medical Center Freiburg and Medical Faculty supported “Zentrum für Biobanking”, FREEZE-Biobank, with its partners as f.e. the CCCF tissue biobank and the CCI liquid biobank, is our answer to meet these new challenges. The speakers will provide an overview of state-of-the-art biobanking of tissue material, (blood-) cells, and liquids and present an outlook, how the new center can support your biobanking individually.

Target group:

Clinician scientists and experimental scientists who are actively involved in lab research

Universitätsklinikum Freiburg und Medizinische Fakultät
Zentrum für Biobanking

Organised by the Research Management, Office of the Dean for Research, Faculty of Medicine, University of Freiburg, Contact: Dr. Jasmin Kroeger, E-Mail: forschungsmanagement@uniklinik-freiburg.de
