

Collaborative Research Centre 992  
Medical Epigenetics

The CRC 992 Medical Epigenetics introduces the concept of

### **MEDEP Fellow**

The CRC 992 would like to identify highly talented and successful scientists in the field of epigenetics, who are in the transition phase from postdoc to group leader.

The **Young Investigator Award** endowed with 30.000 Euro from CRC 992 Medical Epigenetics will support a project in the broad area of epigenetics, from basic research to clinical applications. Successful awardees will become associate members of CRC 992.

Applications must include a CV, project proposal (max. two pages), a simple spending plan and a support letter of the respective PI.

Suitable candidates will be shortlisted and will be requested to present their project to the CRC 992 board.

*Female scientists are especially encouraged to apply.*

Please send applications until latest April 30th 2021 to Stefan Kass at [stefan.kass@uniklinik-freiburg.de](mailto:stefan.kass@uniklinik-freiburg.de) whom you may also contact for further information.
